

Castleton and Cameron Black Specialist to specialist

Cameron Black is one of the leading design, fit out and refurbishment contractors in the UK. It operates throughout London and the Home Counties, working mainly in the commercial, leisure and retail sectors.

The Services

Castleton has been working as a specialist signage sub-contractor for Cameron Black since 2002. During this time we have implemented a wide range of sign and graphics applications, varying in size, complexity and specification.

These have generally been contemporary schemes, requiring high-quality materials and first-class installations. They have included internal reception signage and glass manifestations, contemporary graphics and digital wall coverings, architectural signs and Corporate ID.

Some have been in particularly challenging spaces or applications, where our specialist expertise and

craftsmanship has been utilised to full effect. These have ranged from contemporary nightclubs to marketing suites, from restaurant chains to estate agents.

The Benefits

Working in collaboration with Cameron Black's design and contracting specialists, our responsiveness, experience and knowledge has ensured the successful implementation of each signage application. This includes working on-site alongside other trades, often within extremely tight deadlines and always to the highest quality standards.

Our ongoing relationship with Cameron Black reflects a mutual professionalism and work ethic and a shared passion in the pursuit of

excellence for each and every one of their clients.
